

sophie martin.

Hi, I'm Sophie! I'm an emerging **interaction designer** who has graduated with a Distinction in Bachelor of Creative Industries (Interaction and Visual Design).

I've since learnt skills in UI/UX and visual design, and have a big passion for **web/app and multimedia design, frontend development, and experience design**. As both an artist and designer, I enjoy producing visually engaging digital works that focus on creating fun and interactive experiences. I love designing for people and problem-solving, always striving to create intuitive and user-centered solutions.
